

TERPROLINE
DERMOCOSMETICS SYNCHRONIE
Ciencia, sistemas y tecnologías for skin

Elasticity is defined as the capability of a solid body to return to its original shape and size after any type of deforming force ceases to act on it. The elastic deformation of the skin is caused by the constant action of the force of gravity. During the aging process, or due to other specific causes, the elastic hold of the skin and its capability to contract the deforming force represented by the force of gravity tends to diminish. The cause of this event is found in profound modifications involving the fibrous (collagen, elastin) and non-fibrous (hyaluronic acid) structures of the skin.

TERPROLINE is a range of products created to visibly improve the appearance of the skin by increasing elasticity and tone, based on a carefully balanced blend of four active ingredients, which act together with a professional effect on the synthesis of Collagen, Hyaluronic Acid and Fibronectin.

TERPROLINE remover - Clean and Care System
Represents an innovative concept of dermo-cleaning: applies a soft, effluent foaming and contemporarily removes all impurities exerting a profound no-detergent action.

TERPROLINE face cream - Olesomes Technology
Created for the face and neck, this cream visibly improves the appearance of the skin by preventing elasticity and tone, preventing the formation of wrinkles and diminishing the depth of existing ones. Also recommended:

• Improving and/or maintaining the elasticity and tone of the skin on the face and neck.
• Keeping the skin in good condition before and after procedures such as facials, biophotony and both chemical peels with AHA's and resurfacing treatments, including laser peels.

TERPROLINE body cream - Olesomes Technology
Created to improve the skin's elasticity and tone on the body and in specially targeted areas (Breasts, abdomen, buttocks, thighs). Also recommended for:

• maintaining the elasticity and tone of the skin on the body to improve skin conditions before and after procedures such as liposuction, abdominoplasty, both redressive and reconstructive breast surgery.

TERPROLINE contour eyes & lips - Water Binding System
Specially formulated for the delicate skin around the eyes and lips, this cream can visibly improve the skin's elasticity and tone in the periorbital and perioral areas, enhances elasticity and tone, preventing the formation of wrinkles and smoothing fine lines, with a noticeable cooling effect. Keeps the skin of upper eyelid area in good condition by counteracting "sagging" due to the effect of the force of gravity. Visibly reduces the appearance of "bags" and dark circles under the eyes. Also recommended for use:

• before and/or after treatments with alpha-hydroxy (AHA), chemical peels and resurfacing treatments, including laser peels, performed in the area around the eyes and the lips;
• before and after specific cosmetic operations in the periorbital and/or perioral areas.

Directions: apply once or twice a day, gently massaging until completely absorbed.

TERPROLINE contour eyes & lips - Water Binding System
Specially formulated for the delicate skin around the eyes and lips, this cream can visibly improve the skin's elasticity and tone in the periorbital and perioral areas, enhances elasticity and tone, preventing the formation of wrinkles and smoothing fine lines, with a noticeable cooling effect. Keeps the skin of upper eyelid area in good condition by counteracting "sagging" due to the effect of the force of gravity. Visibly reduces the appearance of "bags" and dark circles under the eyes. Also recommended for use:

• before and/or after treatments with alpha-hydroxy (AHA), chemical peels and resurfacing treatments, including laser peels, performed in the area around the eyes and the lips;
• before and after specific cosmetic operations in the periorbital and/or perioral areas.

Directions: apply once or twice a day, gently massaging until completely absorbed.

ENVIRONMENTALLY FRIENDLY PACKAGING
The tubes it made with polyethylene, a completely recyclable material that can be reused for the production of a wide range of objects.
Starting the material for recycling:
• Tubes + caps: placed with recyclable plastic material.
• Box + product information sheet: placed in container for paper material.
Recycling: stoppage: indicated for maintaining the skin's normal elasticity and tone.

DERMOCOSMETICS SYNCHRONIE
Ciencia, sistemas y tecnologías for the pelle

The concept of elasticity is correlated with the capacity of a solid body to return after a position originally one value that was a constant force deformation ceases to occur. In deformation elastic skin the pelle is covered by the constant action of the force of gravity. During the aging process, or due to other specific causes, the elastic hold of the skin and its capability to contract the deforming force represented by the force of gravity tends to diminish. The cause of this event is found in profound modifications involving the fibrous (collagen, elastin) and non-fibrous (hyaluronic acid) structures of the skin.

TERPROLINE is a range of products elaborated for improve visibly the quality existing of the skin favoring fibronectin and the tonicity and it is based on a carefully association of quattro ingredients di origine biologica, con capacità per agire con effetto sincretizzato sulla sintesi del collagene, dell'acido ialuronico e della fibronectina.

TERPROLINE remover - Clean and Care System
Rappresenta un innovativo concetto di detergenza: applica un'effluvia fovente e contemporaneamente rimuove gli inquinanti esercitando una profonda ma delicata azione detergente.

TERPROLINE face cream - Olesomes Technology
Creato per il viso e dal collo, in grado di migliorare visibilmente la qualità esistente della cute favorendo la fibronectina e la tonicità ed è basato su una curata associazione di quattro ingredienti di origine biologica, in grado di agire contemporaneamente con effetto sincretizzato sui principi del collagene, dell'acido ialuronico e della fibronectina.

TERPROLINE body cream - Olesomes Technology
Creato per migliorare la qualità esistente della pelle del corpo (seno, addome, glutei, cosce) ed è anche consigliato l'utilizzo per:

• migliorare o mantenere in buona stato le condizioni di elasticità e di tonicità della pelle del viso e del collo;

• mantenere in buona stato le condizioni della cute prima e dopo gli interventi di face-lifting, di biotecnologia o peeling con chimico (con AHA) che fisico, incluso il laser peeling.

TERPROLINE contour eyes & lips - Water Binding System
Elaborato per la pelle del viso e del collo, in grado di migliorare visibilmente la qualità esistente della cute favorendo la fibronectina e la tonicità, aumentando la formazione di collagene e diminuendo la profondità di quelle presenti ed è anche consigliato l'utilizzo per:

• migliorare o mantenere in buona stato le condizioni di elasticità e di tonicità della pelle del viso e del collo;

• mantenere in buona stato le condizioni della cute prima e dopo gli interventi di face-lifting, di biotecnologia o peeling con chimico (con AHA) che fisico, incluso il laser peeling.

TERPROLINE remover - Clean and Care System
Representa un innovativo concepto de detergiencia: aplica un éfluvio fovente y al mismo tiempo elimina las impurezas con una profunda pero delicada acción limpiadora.

TERPROLINE face cream - Olesomes Technology
Elaborado para favorecer la mejora visible e a tono de la piel mejorando la calidad existente de la piel, favoreciendo la elasticidad y la tonicidad, favoreciendo la formación de energía y disminuyendo la profundidad de las existentes. Se aconseja también para:

• mantener o mejorar en buen estado las condiciones de elasticidad y la tonicidad de la piel del rostro y del cuello;

• mantener en buen estado las condiciones de la piel antes y después de las intervenciones de lifting facial, de biotecnología y de peeling, ya sea químico (con AHA) o físico, incluido el laser peeling.

TERPROLINE contour eyes & lips - Water Binding System
Elaborado para la piel del rostro y del cuello, mejora visiblemente la calidad existente de la piel, favoreciendo la elasticidad y la tonicidad, favoreciendo la formación de energía y disminuyendo la profundidad de las existentes. Se aconseja también para:

• mantener o mejorar en buen estado las condiciones de elasticidad y la tonicidad de la piel del rostro y del cuello;

DERMOCOSMETICS SYNCHRONIE
Ciencia, sistemas y tecnologías para o pela

O conceito de elasticidade está relacionado com a capacidade de um corpo sólido regressar ao seu posição original depois que uma força deformadora deixa de atuar. A deformação elástica da pele é provocada pela ação constante da força de gravidade. Durante o envelhecimento, ou por outras causas específicas, a capacidade elástica da pele e a sua capacidade de oposição à força deformadora representada pelo força de gravidade, tendem a diminuir. A causa deste evento é que baseada em profundas modificações que envolvem as estruturas fibrosas (colágeno, elastina) e amorfos (ácido hialurônico) da pele.

TERPROLINE é uma linha de produtos elaborados para melhorar visivelmente a qualidade existente da pele melhorando a elasticidade e a tonicidade e baseadas numa associação equilibrada de quatro ingredientes de origem biológica, com a capacidade de atuar simultaneamente com efeito sincretizado, no fortalecimento do colágeno, do ácido hialurônico e da fibronectina.

TERPROLINE remover - Clean and Care System
Representa um conceito de limpeza inovador: tem um efeito lenitivo e simultaneamente elimina as impurezas exercendo uma profunda, mas delicada, ação limpiadora.

TERPROLINE face cream - Olesomes Technology
Elaborado para o rosto e do pescoço, consegue melhorar visivelmente as condições existentes da pele melhorando a sua elasticidade e a tonicidade, impedindo a formação de rugas e diminuindo a profundidade das rugas existentes, igualmente recomendado para:

• manter a integridade da pele, antes e depois das operações de face-lifting, de biotecnologia e peeling, quer químico (com AHA) quer físico, incluindo o laser peeling.

TERPROLINE contour eyes & lips - Water Binding System

DERMOCOSMETICS SYNCHRONIE
Επιστήμη, σύστημα και τεχνολογία για το δέρμα

Η έννοια της ελαστικότητας συνδέεται με τη ικανότητα ενός στερεού σώματος να επιστρέψει στο αρχικό του σχήμα και μέγεθος αφού υπαχθεί στην δύναμη ενός από τους άλλους παράγοντες. Η ελαστική παραμόρφωση του δέρματος προκαλείται από τη συνεχή επίδραση της βαρύτητας. Κατά τη διαδικασία της γήρανσης, ή λόγω άλλων ειδικών αιτιών, η ελαστικότητα του δέρματος και η ικανότητά του να αντιστέκεται στη παραμόρφωση που υποστηρίζεται από τη δύναμη της βαρύτητας, έχει την τάση να μειώνεται. Η αιτία είναι οι βαθύς τροποποιήσεις που συμβαίνουν, ιδιαίτερα η ελαστικότητα και η ικανότητα αντίστασης του δέρματος.

ΤΕΡΠΡΟΛΙΝΕ είναι μια σειρά προϊόντων που δημιουργήθηκαν για την αφαίμαξη των χαρακτηριστικών του γήρατος, βελτιώνοντας την ελαστικότητα και τον τόνο, με βάση ένα δίκτυο ισορροπημένων βιολογικών συστατικών, με την ικανότητα να ενεργούν με αποτέλεσμα συγκεντρωμένο, στο κολάgeno, στο υαλουρονικό οξύ και στην fibronectina, με την ικανότητα να επηρεάζουν την παραγωγή τους.

ΤΕΡΠΡΟΛΙΝΕ remover - Clean and Care System
Καινοτόμο ένα concepto de limpeza inovadora: tem um efeito lenitivo e simultaneamente elimina as impurezas exercendo uma profunda, mas delicada, ação limpiadora.

ΤΕΡΠΡΟΛΙΝΕ face cream - Olesomes Technology
Elaborado para o rosto e do pescoço, consegue melhorar visivelmente as condições existentes da pele melhorando a sua elasticidade e a tonicidade, impedindo a formação de rugas e diminuindo a profundidade das rugas existentes, igualmente recomendado para:

• manter a integridade da pele, antes e depois das operações de face-lifting, de biotecnologia e peeling, quer químico (com AHA) quer físico, incluindo o laser peeling.
